

Airtext^{LT+}

The most affordable text and email connectivity solution in the sky.

The incredible, portable connectivity solution.

If you regularly fly with small passenger loads and don't want to have any installation costs, Airtext^{LT+} will make you very happy. The fully portable system instantly allows up to 6 devices to use text and email during flight time. Just set it up, open the app, and start sending.

Trusted, loved, and flying on hundreds of aircraft.

Airtext is currently installed on 70+ aircraft and serving hundreds of customers every day. It's a solution trusted by pilots and passengers to help them stay in touch with their world. Ask our customers and they'll tell you they love it!

Airtext^{LT+}

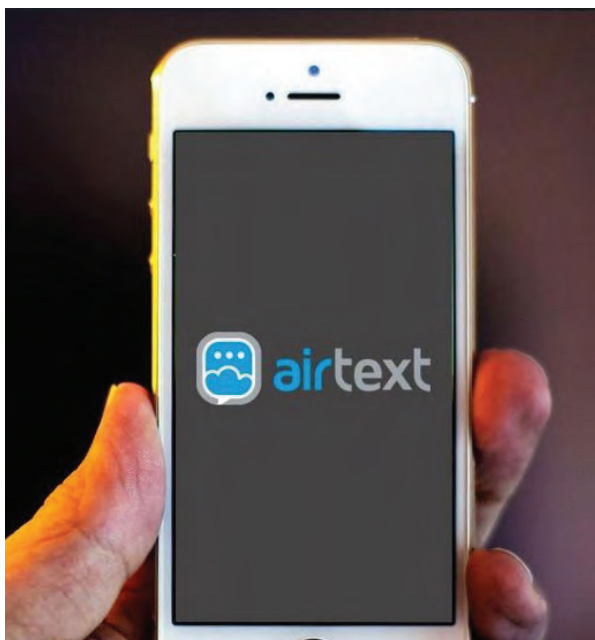

Text messaging / email

Airtext^{LT+} is an amazingly portable and affordable inflight communication solution. Requiring only a "cell phone" size system and an Iridium antenna that's placed on your glareshield, you can instantly enable up to 6 people to use their favorite device for text messaging and emails - anywhere around the globe.

- App-based text/email "hotspot" service.
- Only 5¢ per text and 10¢ per email header.
- Global service via Iridium satellite network.
- Can automatically send takeoff and landing messages to favorite contacts.
- Request and receive METARs and TAFs, anywhere in the world.
- Fully portable equipment.
