

Airtext+

Incredible, affordable phone, text and email for any aircraft.

Simply a better way to connect your aircraft.

Staying connected during flight shouldn't be complicated and cost a small fortune. Airtext+ uses innovative LEO satellite and Bluetooth-based technology to make phone, text, and email service accessible and affordable for any size aircraft, flying anywhere on earth.

Trusted, loved, and flying on hundreds of aircraft.

Airtext is currently installed on 70+ aircraft and serving hundreds of customers every day. It's a solution trusted by pilots and passengers to help them stay in touch with their world. Ask our customers and they'll tell you they love it!
